## **Executive Summary**

Dear Limited Partners,

We are pleased to share the **Project A Fund IV** report for the first guarter of 2025.

#### Market Update

As we kick off 2025, the market continues to navigate a complex environment. According to Pitchbook, despite the potential challenges and volatility imposed by external events (e.g. the new tariff regime), the venture market has reported steady deal activity, with European deal value reaching €16.7B in Q1, marking a 10.8% year-on-year increase and AI continuing its run as a sector that attracts the most investment, closely followed by Fintech deals. This activity is evidenced by our own continued investment pace, finalising six new investments out of Fund IV, and seeing a number of successful follow-on rounds completed across our portfolio, culminating most recently in the addition of Fund IV company Quantum Systems as one of the first unicorns in the European Resilience space. Turning to the exit markets, these are still in the midst of a recovery, with Q1 posting exit values of €11.8B, lower than its comparable period last year. Q1 is unlikely to act as a reliable indicator for exit markets, as they usually feel the effect of general uncertainty more acutely. Nonetheless, this is something we are following attentively and while mega exits remain relatively scarce, Klarna's potential IPO plans and the performance of recently IPO'd companies such as Coreweave are a focal point that could act as catalysts for the sizeable backlog of companies wanting to take the step into the public markets.

#### Highlights Across our Funds in Q1 2025

We have seen continued positive activity in terms of follow-on rounds across our portfolio, most notably:

- Fund III: Industry 4.0 company Anyline closed its Series B extension round. The total round size was EUR 6M.
- Fund IV: Climate Tech company **Enapi** closed its Seed round. The total round size was \$8M and led by Voyager.
- Fund IV: Climate Tech company **Montamo** closed its Seed round. The total round size was EUR 6M led by Alter Equity and Rethink Education.
- Fund IV: Defense Tech company **Labrys** has closed its Series A round. The total round size was GBP 15.5M led by Plural.
- Fund IV: Defense Tech company **ARX** has completed its Series A round of EUR 31M led by HV Capital. As this round took place after March 31, 2025, this is not reflected in the Q1 performance but will be in the subsequent reporting.
- Fund IV: Defense Tech company Quantum Systems has completed its Series C extension round of EUR 70M. Similarly to ARX, this round took place after March 31, 2025 and will therefore not be reflected in the Q1 performance but will be in the subsequent reporting.

Finally, we also made six new investments in Q1:

- We welcomed **Amboss**, a leading digital medical learning and knowledge platform that serves as a comprehensive resource for healthcare students and professionals throughout their careers. This investment is part of our PE-Co-Investment strategy. The total round size was EUR 230M.
- We invested in HomeToGo, a European online marketplace for vacation rentals, established in 2014, that connects travelers with a wide variety of accommodation. This investment is part of our PE-Co-Investment strategy. The total round size was EUR 80M.
- We also invested in Stockholm-based MiMo. MiMo offers an easy-to-use tool to manage, understand and control payments and cash flows – saving European SMEs time and money. The total round size was EUR 8.3M.
- We completed an investment in London-based Riva, which is a Fiat-to-fiat B2B cross-border payment solution operating using stablecoin rails, focusing first on the UK to India and secondly the Europe to India corridor. The total round size was USD 3M.
- We invested in Munich-based Vestigas, which is transforming the management of supplier deliveries on construction sites by digitizing delivery notes. The total round size was EUR 7M.
- Finally, we invested in **Atmen**. Atmen's green compliance and certification platform empowers companies in energy-intensive industries to manage and de-risk green products, continuously and at scale. The total round size was EUR 5M.

With the new investments mentioned above, Fund IV is 55% deployed.

At this stage, we would like to highlight another couple of events we are very proud of. Firstly, as previously noted, we are very pleased with Quantum Systems' continued positive development, culminating in their latest funding round raising EUR 70M at a post-money valuation that puts them above EUR 1B. The company more than doubled their topline revenues in 2024 compared to their previous year, and are poised to continue this extraordinary growth. A fuller announcement is yet to take place, so please do keep this confidential for now.

Furthermore, we are very happy to inform you that Fund V has now reached the final close stage at its EUR 325M hard cap. We are pleased to let you know that the Fund was oversubscribed and allocated in a record time of 5 months after our launch. This is a testament to the strong base of Limited Partners at Project A and we would once again like to take this opportunity to express our deepest gratitude to you for putting your trust in us as your partner

#### Project A Team

There have been no major changes in the Team this quarter.

#### Project A Platform

We started off the year strong by hosting two fireside chats at the START Summit in St. Gallen in order to dive deeper into two of our key verticals, FinTech and European Resilience. To that end, we hosted Paul Becker, re:caps Co-Founder and CEO, to talk about his experiences as a founder and share practical insights as well as taking a forward look on what's next in FinTech. We were also joined by Sven Kruck, Quantum Systems' Co-CEO, exploring how AI-driven autonomy is reshaping aviation, defence, and beyond.

We also took to the stage at the Handelsblatt Security and Defence Conference in Berlin, joining Robert de Groot from the EIB, Balazs Nagy at TYTAN and journalist Larissa Holzki to discuss the future of defense funding in Europe. Some key discussion points included the promising funding boost by EIB of €2B and what is required to bridge the gap to the US.

#### **Operations Team**

In terms of our Operations team, this quarter we have dedicated c. 10,000 hours of support to our portfolio companies. On the PE side, the largest proportion of our support continued to be directed towards PDSG, Onlineprinters and Trendtours, whereas the support on the venture side was mainly dedicated to Arx, Black Semiconductor and Vestigas.

#### Financial Summary & Value Development of Fund IV as of 31 March 2025

- To date, Fund IV has called EUR 199.5M i.e., 66.2% of the EUR 301.5M Fund IV
  - o Of this, EUR 165.8M, ie. 55.0% of the EUR 301.5M Fund I, has been invested
  - There are 37 active portfolio companies remaining
    - Of the EUR 165.8M invested, EUR 151.1M has been invested in 34 venture companies and EUR 14.8M has been invested in five buyout companies (pari passu with Project A Buyout Co-Invest Fund I)
- The total portfolio value of Fund IV as of 31 March 2025 is EUR 240.7M
  - Of this total portfolio value, EUR 226.9M is represented by the venture portfolio and EUR 13.7M is represented by the PE co-investment portfolio
- The Fund's TVPI is 1.2x and Net IRR is 14.2%
- In terms of investment activity for this quarter only, during the first quarter of 2025, Fund IV made four new venture and two new buy-out investments:
  - EUR 4.1M as part of a PE-Co-Investment strategy investment in **Amboss**, a leading digital medical learning and knowledge platform that serves as a comprehensive resource for healthcare students and professionals throughout their careers.
  - EUR 2.4M as part of a PE-Co-Investment strategy investment in HomeToGo, a European online marketplace for vacation rentals, established in 2014, that connects travelers with a wide variety of accommodations. This investment is part of our PE-Co-Investment strategy.
  - EUR 5.2M seed financing in **MiMo**, which offers an easy-to-use tool to manage, understand and control payments and cash flow saving European SMEs time and money.
  - USD 2.9M pre-seed financing in Riva, a Fiat-to-fiat B2B cross-border payment solution operating using stablecoin rails, focussing first on the UK to India and secondly the Europe to India corridor.
  - EUR 4.5M seed financing in Vestigas, a company transforming the management of supplier deliveries on construction sites by digitizing delivery notes.
  - EUR 4M seed financing in Atmen, a green compliance and certification platform empowering companies in energy-intensive industries to manage and de-risk green products, continuously and at scale.
- There was one capital call this quarter, Drawdown Notice 14 on 31.03.2025.

Thank you for your support and as always, if you have any questions, do not hesitate to reach out to us.

Best wishes, Your Project A Team

#### **Company Overview**

Re:cap is building a two-sided marketplace connecting companies that have monthly or quarterly recurring revenue with investors who bid to purchase these revenue contracts for their annual value, upfront.

### **Recent Developments**

- → Increased revenue by 24% quarter-over-quarter, resulting in an EUR 8.4M run rate by the end of Q4 2024.
- Achieved significant traction with cash insights, including >400 sign-ups, >200 completed onboardings, and >30 paying users.
- → Integrated funding optimization and cash insights into a unified strategy called "The Capital OS" for the next 2-3 years.

- → Focus on the transition to a new financing/legal structure.
- → Optimize and expand the debt product by switching to new infrastructure and a credit risk model.
- > Fully digitalize the customer journey and launch preparatory bookkeeping.

### **Company Overview**

Vay is a Berlin-based deep technology company operating a teledrive-first, safetycertified, commercial fleet for D2C mobility on public streets.

#### **Recent Developments**

- → We had our best quarter despite reducing geofence and stopping marketing efforts (USD 100k in total B2C revenue since our launch).
- → First signed US B2B contract with a committed USD 1.85M in revenue in 2025 (50% gross margin).
- → Successful CES Update as part of planned 2025 Series C fundraising.

- Product focus on B2C system stability.
- → Focus on unlocking vehicle financing beyond HSBC to reduce dependency risk.
- Aiming to achieve milestones on B2C and B2B ahead of Series C fundraising.

### **Black Semiconductor**

#### **Company Overview**

Black Semiconductor's goal is to manufacture and market extremely powerful microchips with integrated electronic photonic circuits.

Based on over 20 years of experience in CMOS, photonic chip development, and pioneering work on graphene technology since 2006, they are in the process of initiating a paradigm shift in chip technology.

#### **Recent Developments**

- The company's targets for 2025 include demonstrating a Proof-of-Concept (POC) link with specific performance speeds on 200mm wafers by December 2025 and providing leadership in Graphene integrated photonics solutions.
- Departmental checkpoints are in place across six logical groupings: Product, Technology, Commercial, Financial,
   Infrastructure, and Organizational.
- → Key progress has been made in the POC Characterization Plan, with photonics-related runs on track and electronics tape-out also proceeding.

- → The company is focused on executing its 2025 budget, including equipment leases and fundraising for the Series A2 round.
- > Plans are in place to improve production processes, advance photonic design, enhance measurement and characterization, and develop a packaging strategy.
- A marketing and communications strategy is being implemented to build authority and generate demand, including brand development, content creation, and participation in industry events.

### **Netspeak Games**

#### **Investment Overview**

Founded	March 2019
HQ	London, United Kingdom
Sector	Gaming
Date of First Investment	January 2022
Financing Round at Entry	Series A
Subsequent Financing Rounds	- (-
Latest Financing Round (Date)	Series A (January 2022)
Ownership	9.20%
Other Main Co-Investors	Lakestar, Makers Fund
Project A Board Representation	Jack Wang
Invested Capital	EUR 3.6M
Fair Market Value	EUR 3.3M
Realisations	EUR 0.0M
Fair Market Value + Realisations	EUR 3.3M
Gross MOIC	0.90x
Gross IRR	-3.21%
Valuation Methodology	Price of recent investment

#### **Company Overview**

London based game studio making an Animal Crossing inspired free-to-play mobile game targeting casual and midcore players.

#### **Recent Developments**

- → Overall retention curves remain strong initial testing with D1 still hitting 40-45% with clear path to improvement.
- > Team dropped the real-time unreal multi-player backend in favour of a lighter async player backend which also reduces maintenance costs and burn. The reduction in game load time should further improve early retention.
- → Game is still tracking to KPI goals with further refocus on farming game loop and monetisation.

- Company has about 16 month runway to achieve its goals without further fundraising and enough for a small marketing budget. CEO is very conservative on cash at the moment given the gaming investment environment.
- → Company successfully tested in the Brazil market Q1 2025 with positive metrics and data. Plan is to test in a Tier 1 market (US, Canada etc.) for Q2 before optimising for a successful global launch in Q3.
- → Company is also running tests for non US markets as their initial launch given the high user acquisition costs of the US market and instead focusing on localising tier 2 countries.

#### **Company Overview**

Development of a fully electric, short-haul airplane ("microliner") for regional air mobility. The vision is to (co-)operate an end-to-end mobility service around a network of regional connections.

#### **Recent Developments**

- > Vaeridion entered a strategic partnership with Bosch Aviation Technology to accelerate the development of its all-electric Microliner, focusing on electric mobility and battery management systems.
- → The company appointed Markus Kochs-Kämper as Chief Technology Officer and Taco Stouten as Chief Commercial Officer to strengthen its leadership team and drive technical and commercial progress.
- Vaeridion played a leading role in the BERTL project, which found strong support among regional airports for adapting infrastructure to accommodate electric aviation.

- > Vaeridion is advancing towards the Preliminary Design Review (PDR) by the end of 2025, marking a significant step in the aircraft's development and certification process.
- → The company plans to expand its commercial operations through its Dutch subsidiary in Delft, leveraging the innovation ecosystem surrounding TU Delft.
- → Vaeridion aims to initiate certification-confirming prototype flights by 2027, with the goal of commencing commercial operations by 2030.

### **Company Overview**

Dalma's main activity is to develop and operate, as an insurance broker, a digital platform connecting authorized insurers offering an insurance service covering risks and damages related to pets and pets' owners. Furthermore, Dalma is on a mission to create the leading pet care app in Europe by launching an app that will aggregate new services beyond insurance: for instance unlimited live chat features with approved veterinarians to help pet parents take care of their dogs and cats every day.

#### **Recent Developments**

- → Raised EUR 16.5M in Series B financing led by Breega, giving the company runway to grow of at least 3 years.
- → Focus in Q1 was to strengthen foundations (notably pricing engine and insurance stack) before resuming stronger growth from Q2 onward.
- → At the end of Q1, the company insured over 60k pets, with an annual GWP of EUR 23.5M which translates to EUR 4.6M in ARR.

- Launch the diversification of the insurance stack with the addition of a new insurer.
- → Refine pricing strategy (new business / renewal) in France and Germany.
- → Explore buy and build strategy with a small insurance player (EUR 4M in GWP) in France.

#### **Company Overview**

Quantum Systems specializes in the development, design and production of small Unmanned Aerial Systems (sUAS) for clients in security, defence, public safety, commercial and geospatial operations across Europe.

### **Recent Developments**

- Quantum Systems secured multiple high-value contracts across Europe, including verbal agreements for significant aid packages to Ukraine and a substantial tender from the Spanish Ministry of Defence.
- → The company successfully integrated newly acquired entities, such as AirRobot and EFT, enhancing its operational capabilities and expanding its product offerings.
- → Quantum Systems launched a cross-media campaign in Berlin to advocate for decisive political action, emphasizing the importance of aerial intelligence and unmanned systems in Europe's evolving security landscape.

- The company is planning to establish new entities in India and the Baltic states to strengthen its international footprint and contribute to regional defence initiatives.
- Quantum Systems is deepening collaborations with major defence partners, including Airbus and HENSOLDT, to co-develop integrated solutions for multi-domain operations.
- → The company is preparing for a Series C funding round, aiming to attract strategic investors to support its growth trajectory and technological advancements.

#### **Company Overview**

11x is building the platform for AI-enabled autonomous agents. Their first product Alice, is a fully automated end-to-end SDR, already achieving higher conversion rates than human SDRs and showing incredible product-market-fit within 6 weeks of launching. We led their pre-seed in October last year and have been very impressed by his execution since then. More than 50% of their customers are already in the US and they are about to launch their first self-service product, so now could be an interesting time to chat.

#### **Recent Developments**

- → Grew team to about 55 people based in San Francisco (HQ) and London. Made several outstanding leadership hires, including at C-level.
- → In addition to their outbound agents Alice and Mike, launched their first inbound agent Julian, proving their compound growth strategy.
- → Closed the first quarter with more than USD 14.5M in contracted ARR and USD 12.6M in Live ARR.

- → Continue to switch customers over from the first product to a rebuilt, more robust version.
- → Expand cross-selling of inbound caller and outbound worker while preparing launch of consecutive workers.
- > Continue to optimize retention through a sharpened ICP focus and enhanced customer success setup.

#### **Bucket**

#### **Investment Overview**

Founded	March 2021
HQ	Copenhagen, Denmark
Sector	Business Software
Date of First Investment	May 2023
Financing Round at Entry	Seed
Subsequent Financing Rounds	-
Latest Financing Round (Date)	Seed (May 2023)
Ownership	15.03%
Other Main Co-Investors	- O
Project A Board Representation	Jack Wang
Invested Capital	EUR 2.7M
Fair Market Value	EUR 2.6M
Realisations	EUR 0.0M
Fair Market Value + Realisations	EUR 2.6M
Gross MOIC	0.99x
Gross IRR	-0.71%
Valuation Methodology	Price of recent investment

#### **Company Overview**

Product and Engineering teams, which usually are the biggest cost centres, often do not have transparency on engineering resources spent / ROI on developing and shipping products. Bucket aims to solve this problem by providing product and engineering teams insights on both customer engagement behaviour and engineering resources spent on a product feature level. This enables the product teams with both quantitative and qualitative metrics to 1) benchmark ROI for comparable new features under consideration and 2) redeploy engineering resources away from existing underutilised features. More interestingly, Bucket also enables engineering teams to be measured to a more strategic KPIs that drives value than existing engineering productivity platforms.

#### **Recent Developments**

- > Company have signed additional customers including CodeClimate which is a big US scale-up over the last quarter, however, still remain behind revenue plan.
- → The company shipped their MCP feature which allows agents to work with Bucket directly from the user prompting. As a direct result of this, Bucket was featured on Cursor's Featured MCP list.
- Company hired 2x product marketing hires over the last quarter to boost their product marketing efforts. The majority of people in the organisation have been in Sales and Sales Engineering focused for the last 2 quarters.

- Board continues to push founders to seek "inflection" point in revenue in order to hit Series A revenue metrics.
  Unfortunately, the company is behind revenue plan but there are 2-3 projects that could realise these inflection points.
- → On the back of Bucket's MCP feature, Bucket has been invited to co-market with Linear (popular US dev tool scale-up) on their "Linear for agent" campaign. This could be a lift for Bucket's GTM efforts and potentially drive revenue.
- Company continues to receive strong signals from customers but translation of those signals to paying sign-ons has been slow. Board is actively working with the founders on these relatively to their runway and fundraising plans.

### **Cosmic Lounge**

#### **Investment Overview**

Founded	March 2022
HQ	Helsinki, Finland
Sector	Gaming
Date of First Investment	April 2023
Financing Round at Entry	Seed
Subsequent Financing Rounds	
Latest Financing Round (Date)	Seed (April 2023)
Ownership	1.11%
Other Main Co-Investors	- O
Project A Board Representation	Jack Wang
Invested Capital	EUR 0.2M
Fair Market Value	EUR 0.2M
Realisations	EUR 0.0M
Fair Market Value + Realisations	EUR 0.2M
Gross MOIC	1.00x
Gross IRR	0.16%
Valuation Methodology	Price of recent investment

#### **Company Overview**

Cosmic Lounge produces puzzle games like Candy Crush for mobile devices. They reimagine the creative process by introducing no-code tools, generative AI, and in-depth audience personality analysis to optimise the creation and testing process. The key to their technology is the combination of the two following parts: 1) AI-enabled asset generation and a proprietary puzzle engine with no-code editing allows the team to build prototypes faster than ever before. 2) Meanwhile, a systematic approach to every step of conceptualization allows them to pick the variants that have the highest probability of becoming the next hit game faster and cheaper.

#### **Recent Developments**

- Company have made good progress further developing its game now showing strong day 14 retention and early positive return on advertising metrics. Standalone, the signal is that this game could be self sustainable but too early to tell if it will be a USD 1B+ outcome.
- Company started fundraising process for a EUR 10M Series A on the back of positive day 14 retention numbers, return on advertising spend and their investment into the AI game engine. It is unlikely for Project A to participate given the metrics are not definitive enough and our very small initial check into the company.
- Previously mentioned bridge round closed with EUR 1.5M from largely existing investors. Project A did not participate in the round.

- > Founders have now brought burn under better control ahead of Series A fundraising.
- → CVC recently purchased Dream Games for USD 5B which is a VC backed studio in the same category as Cosmic which sends a strong signal to the gaming investment community that there are venture scale outcomes and could reboot the gaming content investing ecosystem which have been sluggish since post Covid.
- → Company moral and PR remains strong as it is still a very unique value proposition in the gaming market, leaning into generative AI game design.

### **Company Overview**

Copay is building a working capital platform addressing payments within the construction sector. Their product simplifies invoicing for subcontractors and allows them to set discounts on their submitted invoices based on current cash flow needs to faster unlock access to working capital. General contractors have simplified Accounts Payable workflows due to homogeneous invoices submitted by subcontractors and can settle the submitted invoices earlier in case it matches their desired expectation of a discount.

### **Recent Developments**

- → Signed first customer, a top 10 UK housebuilder with GBP 1.2B in revenue, which presents a GBP 0.5M ARR opportunity.
- → Strong pipeline now with multiple deals expected to close in May.
- Core team onboarded with two engineers and one commercial lead UK.

- → Seeing stronger traction and pipeline velocity from housebuilders over the past months and now doubling down on this construction segment.
- → Launching and rolling-out first customer over 3 months POC.

#### **Company Overview**

Relay is a tech-enabled delivery network purpose-built for e-commerce that has rebuilt the entire parcel journey from retailers' warehouses to the consumers' doorsteps. By building a managed network of asset-free hyper-local partners such as pitstops and couriers, Relay is able to remove the need of suburban area sorting depots that incumbents still rely on, thus making parcel deliveries more efficient and sustainable. Relay's network design enables them to compete with the biggest delivery companies on service quality and rates which allows them to take on volume share from the biggest retailers in the UK.

### **Recent Developments**

- → Revenue has grown by 8x YoY as of Apr-25 fuelled by growth across key clients Temu, TikTok, ASOS, and Vinted.
- → Forecasting 1m monthly parcel deliveries and positive gross margin by May.
- > Future growth commitments from existing clients will drive 4x volume increase from April to year end.

- → Identified multiple leavers to decrease cost per parcel in last mile beyond plan.
- → Expanding C2C pitstop network to drive margins.
- → Introducing robotics to reduce the need for FTE and increase routing efficiency in sortation.

#### **Company Overview**

ARX is a defence technology manufacturer that produces autonomous Single-To-Multi-Use unmanned ground vehicles (UGVs) to spearhead automation in both military and civilian use cases. Its modular robot platform is used for simulation and training, intelligence gathering and active support for military and civilian personnel.

#### **Recent Developments**

- ARX Robotics prepared a significant Series A funding round, building strong investor momentum with strategic interest from both institutional and defence-focused backers.
- The company formally announced its expansion into the UK, including plans for a new headquarters in London and the launch of a major production facility in south-west England.
- A strategic partnership was initiated with Daimler Truck to integrate ARX's Mithra OS into military mobility platforms, aligning efforts to enhance AI-driven defence capabilities.

- ARX Robotics plans to quintuple its production capacity by the end of 2025 to meet anticipated demand for autonomous unmanned ground vehicles in Europe.
- → The company aims to adapt its Mithra OS platform for broad deployment across NATO vehicle fleets, supporting interoperability and autonomy upgrades.
- → Investments are underway to expand the engineering team with top-tier AI talent across Europe, accelerating the development of next-generation defence robotics.

### **Company Overview**

Montamo is building a next-generation fullstack installation provider in energy renovations. They will focus on heat pumps first. They will train and upskill their own workers internally and increase efficiencies through the use of software.

### **Recent Developments**

- → Opened their second location Stuttgart next to their flagship location in Munich and closed first contracts for the second quarter. This allows them to solidify their playbook to eventually outsource new locations through franchise contracts.
- → Revenue growth is mainly supply-constrained rather than demand-constrained. Despite a challenging macroeconomic environment, demand growth continues to perform strongly above market.
- Closed a EUR 6M seed round led by French fund Alter Equity and US fund Rethink Education with participation from Project A and Firstminute Capital.

- → Prepare opening of a third location with more of the launch processes outsourced to deliver first proof points of the franchise strategy.
- ightarrow Increase frequency of bootcamp programmes to reduce the gap in demand and supply of installers.
- → Continue to optimize retention through a sharpened ICP focus and enhanced customer success setup.

#### **Company Overview**

Mindfuel provides a data collaboration hub that facilitates the collaboration between business domains and data teams. Their platform acts as a management platform on top of existing technology and infrastructure layers, providing transparency, overview, and value-driven management of data initiatives.

### **Recent Developments**

- While still being early stage, Mindfuel has been able to convince several new enterprise clients to start using Delight. Moreover, the company has sharpened its understanding of the ideal customer profile and a corresponding "go to market" - approach.
- In order to increase the level of focus in the organization, Mindfuel has started to initiate a sales process for its consulting activities engaging with a number of potentially interested parties. This is also likely to substantially increase the cash runway for the business, obviously depending on the exact outcomes of this process.
- Project A's operational support has been limited focusing on product and GTM aspects.

- → Continuing to build sales traction and developing the GTM playbook for Delight remains key priority.
- > Furthermore, finalizing the sales process of the consulting activities is another core goal for the next quarter.
- Project A's operational support is likely to stay limited for now due to budget constraints however, there is a strong interest in cooperating in particular in terms of sales/GTM.

### **Company Overview**

Rematiq is building AI regulatory compliance SaaS for MedTech device manufacturers.

### **Recent Developments**

- → Closed first enterprise ARR customer Tier 1 Medtech. Started pilot with Bayer and another global Tier 1 Medtech, got the purchase order from another Tier 1 Medtech.
- → Announced funding that got picked up by 10 news outlets including Handelsblatt.
- → Hired SDR, designer, ML freelancer. Still searching for ML lead.

- > Full focus on finding PMF with 5 enterprise customers. Focus on sales cycle acceleration, deeper existing customer discovery and building out pipeline.
- → Deepening product features, focus on building requirement database and simplifying existing processes.
- > Rebranding of the website and visuals to make it more industry friendly.

### **Distil Labs**

#### **Investment Overview**

Founded	July 2024	
HQ	Berlin, Germany	
Sector	Data Infrastructure

Gross IRR	0.00%	
Valuation Methodology	at costs	

### **Company Overview**

Distil Labs is building infrastructure and tooling for small language models, that will help companies to adapt models to specific business tasks with lower latency and structured output.

#### **Recent Developments**

- → Company started fundraising process for their Seed round and has strong early traction with 2 terms sheets already offered. Founders are working through final round construction with Project A. Seed round is expected to be around EUR 4M to 5M.
- → Company secured 2 paying customers one in the DefenceTech space and one in the Enterprise AI Platform space. Founder led sales have built a sizable early customer pipeline focusing on on-prem, resource constrained LLM use cases which we hope to convert for the Seed to Series A round.
- Both Senior Data Scientist and Senior Machine Learning Engineer are in place. Rest of the hires will be finalised post Seed round.

- > Founders have executed very well with the pre-Seed capital in terms of customer traction, hiring and fundraising. They now have 6-month runway and are close to finalising their Seed round.
- Product marketing message has been sharpened significantly to focus on "resource constrained" usage of large language models (replacing them with small language models). Defence industry is one of those very specific use cases which Project A has helped them with a few customer introductions.
- > Founders need to work on improving their GTM plan and focus on execution with the Seed round, which today has been largely founder-led and not built scalably.

### **Company Overview**

Aipo Labs is building the access layer for agents to access and authentic everyday applications.

### **Recent Developments**

- → There has been increased competition in the Agentic API access space since our investment. Most notable is the MCP launch by Anthrophic which was unexpectedly adopted by OpenAI. Nevertheless, the space is exciting despite moving on a monthly basis in terms of industry adoption.
- → Given this constant shift and increased competition, the founders have decided to take an open-source approach to some of the API connection they delivered so far as an offensive move against other VC backed-startups in this market and lean into the MCP hype.
- As of writing this report, Aipo Lab's open-source repo has been trending for the last 2 days as the no. 1 and no. 2 most popular daily repo on Github worldwide.

- → Founders continue to drive GTM and product marketing messages across all channels and have gotten direct messages from customers converting from other platforms.
- While the open-source traction is strong, the founders are conscious that it means they have to find more monetizable value deeper into the stack and is actively planning for this.
- → The board is considering accelerating fundraising on the back of open-source traction.

### **Nettle**

### **Investment Overview**

### **Company Overview**

Nettle is the world's first AI Co-Pilot for risk engineering within the commercial insurance value chain where assets are assessed through inspection visits and findings are presented to underwriters in a written report.

### **Recent Developments**

- → Onboarded a second experienced Risk Engineering advisor with network amongst global leading insurers.
- → Hired founding software engineer, founding AI engineer and senior software engineer now a team of 5 FTEs.
- Continued building pipeline across Europe and the US.

- → Kicked off a first Proof of Concept with a major insurer working closely with their Underwriting and Risk Engineering teams to deeply understand workflows and pain points.
- Defined the brand and launched their website in March alongside the announcement of our pre-seed round and a series of thought leadership articles.
- → Kicked off accelerated ISO27001 compliance programme.

Gross MOIC	1.00x	
Gross IRR	0,00%	
Valuation Methodology	price of recent investment	

### **Company Overview**

Vestigas is transforming the management of supplier deliveries on construction sites by digitizing delivery notes. Their app allows construction workers at general contractors and suppliers to sign delivery notes digitally and save this information for easy access by other teams for invoicing. Vestigas aims to expand their services to offer broader supply and sourcing tools, allowing them to expand into the long-tail of SME general contractors. In the long run, they aim to cover the entire supply chain, including supplier sourcing and financing.

#### **Recent Developments**

- → Contracted and live ARR as well as NRR significantly above financial plan.
- → Signed GC Group as the first wholesale customer with significant six figure ACV.
- Progress with suppliers slower for some core accounts than anticipated.

- → Focus is on converting contracted ARR to live ARR by scaling roll-outs.
- → Aiming for product to be fully scalable for long tail expansion and all large accounts until Q3/2025.
- → Strong push on org building and hiring with focus on product & CS.

### **Company Overview**

HomeToGo SE is a European online marketplace for vacation rentals, established in 2014, that connects travellers with a wide variety of accommodations. The company is headquartered in Berlin and is listed on the Frankfurt Stock Exchange (WKN: A2QM3K). HomeToGo has evolved from a metasearch engine to a marketplace with SaaS capabilities and various service offerings. The company operates in 25 countries and offers travellers with over 15m accommodations the largest selection of vacation rentals worldwide with an easy and intuitive booking experience.

#### **Recent Developments**

- → Signed definitive acquisition agreement with Interhome.
- → Strong finish of 2024 with +31% in revenue and EUR 12.8M adj. EBITDA.
- → Very good bookings backlog.
- → Note: Given the nature of HomeToGo being a listed company, available information is as of 31.12.2024.

- → Prepare Interhome integration and synergy realisation.
- → Continue strong growth momentum marketplace and SaaS business.
- → Reach close to break-even quarter (LY was -21m).

Realisations	EUR 0.0M
Fair Market Value + Realisations	EUR 0.0M
Gross MOIC	1.00x
Gross IRR	0.00%
Valuation Methodology	at costs

### **Company Overview**

Atmen's green compliance and certification platform empowers companies in energy-intensive industries to manage and de-risk green products, continuously and at scale.

#### **Recent Developments**

- → Closed their seed round led by Project A with participation from outstanding angels including Axel Stepken (former CEO TÜV Süd) and Martina Merz (former CEO ThyssenKrupp).
- Atmen were used in the first TÜV Süd audit of a renewable fuel production plant and the first renewable fuel certificate issued in France. This further solidifies their position as a thought leader in the space.
- Have started a task force to explore becoming a certified auditor, which would allow them to capture more value from existing auditors and ensure a smoother end-to-end certification process for their clients.

- → Establish a task force to evaluate a strategy to become a certified auditor and reduce dependencies on existing auditors such as TÜV Süd or Bureau Veritas.
- Roll out the product both vertically along the value chain of their customers' supply chains (e.g. to suppliers, commodity traders, consumers) and horizontally to other commodities beyond green hydrogen.
- > Prove that they can become a central data hub by enabling both verifiers and label owners to access Atmen's data in audit processes.

### **Partnership Overview**

Fund Project A Ventures IV GmbH & Co. KG

Fund currency Euro

Financial year-end 31 December

Accounting principles HGB

Valuation policy Invest Europe Valuation Guidelines

First closing 15 November 2021

Final closing 23 May 2022

Vintage year 2022

Total commitments EUR 301.50M

Term 10 years (with option to extend)

Investment period 5 years (or when 60% of the capital is invested)

Credit Line Credit facility contract implemented with UniCredit;

Size: Up to EUR 20M per quarter **Duration:** Maximum one quarter

Terms: 2.75% base + variable rate based on EURIBOR 3-month rate changes for drawn credit and 0.5% per quarter of the remaining undrawn portion of EUR 20M

Fund domicile Germany

Legal form GmbH & Co. KG

General partner Project A Ventures IV Komplementär GmbH

Julie-Wolfthorn-Straße 1

10115 Berlin
